Forecast For The United Kingdom
Issued by Met Office Exeter
at 1400 on Wednesday 14 Apr 2021

UK Outlook for Thursday 29 Apr 2021 to Thursday 13 May 2021:
Confidence remains low during this period, however, mixed and slowly evolving weather patterns, typical of spring, are most likely through the end of April and into May. Fine and dry weather is expected to be more prevalent on the whole, with fair-weather cloud and plenty of sunny spells, although all areas are likely to see some showers or longer spells of rain at times. Temperatures are likely to be close to average for the time of year, with warmer spells possible at times.
